Muhammad Salihu

Executive Senior Software Engineer at SMARTFLOW with expertise in Software, AI and data engineering.

Minna, Niger State, Nigeria

Summary

I am a seasoned Software Engineer with over seven years of professional experience in building scalable, high-performance applications using Python, JavaScript, C, C++, and C#. I have successfully delivered end-to-end solutions across multiple industries, leveraging my versatility in both high-level application development and low-level systems programming.

At SMARTFLOW TECHNOLOGIES LTD, I focus on refining enterprise-grade solutions through Internet of Things (IoT) innovations for remote monitoring. I've played a pivotal role in enhancing the SmarEye application, ensuring it scales reliably to meet the dynamic and mission-critical demands of the Oil and Gas sector. My work involved upgrading legacy codebases and implementing robust CI/CD pipelines, significantly improving deployment efficiency and code quality.

Previously, at ZeroTech Agency LTD, I made impactful contributions to the Vibes app, optimizing its performance and developing efficient scheduling systems. I demonstrated strong proficiency in backend development and API integrations, while working within Agile teams to deliver features aligned with client expectations and industry best practices.

My technical arsenal includes frameworks such as Django, FastAPI, React.js, Next.js, and Node.js, as well as deep experience with PostgreSQL, MySQL, and MongoDB. I've also architected solutions involving machine learning, Bluetooth device communication, and real-time facial recognition, emphasizing performance, reliability, and clean architecture.

I hold a Bachelor's degree in Computer Science from Ahmadu Bello University, Zaria, Nigeria, and maintain a strong commitment to continuous learning, mentorship, and excellence in software

engineering. I pride myself on solving complex technical problems, writing clean and maintainable code, and delivering impactful solutions that bridge user needs and technical innovation.

Experience

SMARTFLOW TECHNOLOGIES LTD

3 years 5 months

Executive Senior Software Engineering

March 2024 - Present (1 year 9 months)

Ikeja, Lagos State, Nigeria

Software Engineer

July 2022 - Present (3 years 5 months)

Lagos, Nigeria

As a software developer, I maintained and optimized the SmarEye application, which is an enterprise B2B solution that leverages IoT devices for remote monitoring and data insight of tanks, automated pumps, and equipment at retail Oil and Gas stations.

I collaborated with the software development and testing team members to design and develop robust solutions that met the client's requirements for functionality, scalability, and performance. I also updated outdated code bases to modern development standards, improving functionality and efficiency.

I efficiently deployed and integrated software engineered by the team and updated integration/deployment scripts to improve continuous integration practices. Additionally, I built innovative microservices and web services to enhance the overall functionality of the application.

Punch Group

MERN Stack developer

March 2024 - January 2025 (11 months)

San Francisco Bay Area

Contributed to a project focused on proof object detection using machine learning techniques. The project aimed to develop a system capable of analyzing images to detect whether they contain valid or invalid video proofs. Served as a key member of the development team responsible for implementing various components of the proof detection system. Collaborated

with team members to design and develop algorithms for image classification and model training.

Utilized Python programming language for development tasks, including data preprocessing, model training, and evaluation. Implemented machine learning models using libraries such as PyTorch and scikit-learn.

Managed data storage and retrieval using Amazon S3, ensuring efficient storage and organization of image datasets. Configured AWS services to support model training and deployment, optimizing performance and scalability.

Collaborated closely with team members to troubleshoot issues and optimize the performance of machine learning models. Demonstrated strong problem-solving skills in resolving technical challenges and meeting project deadlines

ZeroTech Agency LTD

Back End Developer

January 2023 - March 2023 (3 months)

Brighton, England, United Kingdom

Refactored and optimized the Vibes app by eliminating the need to retrieve data into Python memory through the database operations. This modification resulted in reduced server resource usage.

Developed a scheduling system similar to Calendly using the Google Calendar API.

Integrated third-party APIs from external applications into web platforms.

Debugged and tested software to improve efficiency and clean up the code.

Collaborated with an Agile Scrum team in a high-tempo production environment.

QualiByte

Full-stack Developer

July 2021 - October 2022 (1 year 4 months)

Niger, Nigeria

I played a key role in developing a loan management application from start to finish. This included participating in the code design and development, DevOps, product launch, and ongoing maintenance.

Collaborating with back-end developers, I helped design APIs that were crucial to the application's functionality.

To streamline the application's development process, I oversaw and implemented automated build and deployment pipelines. This helped to ensure that updates and changes were efficiently integrated and deployed, saving time and resources.

3Deez Global Nigeria Limited

Full-stack Developer

December 2018 - February 2020 (1 year 3 months)

Niger State, Nigeria

> Created multiple web applications, participating in the whole process of their development: product design and estimation, code design and development, DevOps, UI/UX design, product launch and maintenance.

Itbaez Solutions

Frontend Developer

January 2017 - September 2018 (1 year 9 months)

Niger State, Nigeria

Through out the development process, I collaborated with stakeholders to ensure that our creative proposals and design best practices were meeting their needs and expectations.

To improve the user experience and provide greater design versatility, I worked on enhancing the application's tools and features.

As a liaison between marketing and IT, I facilitated effective communication and collaboration on web development projects. This included integrating front-end assets with back-end systems to ensure a seamless and cohesive user experience.

Diamond Global Academy

Computer Science Instructor

January 2014 - November 2016 (2 years 11 months)

Niger State, Nigeria

Responsible for developing interactive and interesting lesson plans based on approved curriculum.

Responsible for a passing rate of 90 percent.

Responsible for creating several after school computer labs that helped students understand how to properly use the Internet.

Assisted in developing interactive learning programs with other teachers that wanted to utilize Internet tools.

Responsible for maintaining and upgrading all of the computers in the lab.

Education

Ahmadu Bello University

Bachelor of Science - BS, Computer Science · (May 2024 - May 2027)
